PROFESSIONAL SUMMARY

Detail-oriented **Software Engineering student** and **Team Lead** with a strong foundation in Full-Stack Web Development and UI/UX Design. Proven track record of leading e-commerce development and building responsive, user-centric applications. A high-agility learner with a passion for mastering new technologies and solving complex logic problems in fast-paced environments.

TECHNICAL SKILLS

- **Languages:** PHP, Java, JavaScript (ES6+), HTML5, CSS3, SQL
- **Frameworks/Libraries:** Bootstrap 5, JavaFX
- **Design & Tools:** Figma, Canva, Git/GitHub, VS Code, Eclipse
- **Databases:** SQLite, MySQL
- **Soft Skills:** Team Leadership, Instructional Design, Rapid Prototyping, Adaptability

EDUCATION

National University of Technology (NUTECH) | BS Software Engineering | 2023 – 2027

- Current SGPA: **3.25 / 4.0**
- Current CGPA: **2.95 / 4.0**

EXPERIENCE

Techora (Startup) | Intern - Team Lead (E-commerce) | Summer 2025

- Led a development team to build a dynamic e-commerce platform, converting static designs into functional PHP-based web applications.
- Architected core modules including product listings, secure form validation, and backend data processing.
- Ensured 99% responsiveness using custom CSS and JavaScript.

SK Coaching's | Social Media Creator & Teacher | 2024 – Present

- Instructs students in Computer Science and Web Development (HTML/CSS/JS), simplifying complex logic for beginners.
- Manages digital branding by designing high-engagement social media assets using Canva for WhatsApp and Facebook.
- Assists in academic administration, record keeping, and certificate generation.

PROJECTS

FoodFlow – Food Recommendation & Ordering System

- Developed a **Streamlit-based web application (Python, SQLite3)** for food recommendation, ordering, and vendor management with a responsive and interactive UI.
- Implemented a **dual recommendation system** (Randomized + Top-Rated) using **Pandas** for data handling and user preference-based filtering.
- Built a **cart & order tracking system** with real-time status updates (Order Received → Preparing → Out for Delivery → Delivered) using **Streamlit session state**.
- Designed a **user review & rating module (1–5 stars)** with **Plotly visualizations (bar charts/histograms)** to analyze category-wise food feedback and improve recommendations.

Byosecure Pro – Security Dashboard UI

- Designed a modern security interface with Dark/Light mode persistence via Local Storage.
- Built interactive components including activity feeds, statistics cards, and collapsible navigation.
- *Technologies:* HTML5, Bootstrap 5, JavaScript, Google Fonts.

Library Management System (Desktop)

- Engineered a Java-based application using the MVC pattern and JavaFX.
- Developed features for user roles, book issuing, fine management, and reservations. □
- *Technologies:* Java, JavaFX, FXML, SQLite.

Faisal Movers Prototype

- Designed a high-fidelity Figma mockup for a travel booking platform focusing on user flow and interactivity.

ACHIEVEMENTS & INTERESTS

- **Technical Leadership:** Successfully managed a team of developers during a 3-month intensive startup internship.
- **Instructional Coding:** Experienced in teaching Scratch and basic programming to younger students.
- **Quick Learner:** Proven ability to rapidly pick up new frameworks and implement them in live projects.
